

## Guidelines for Computer Disk Art Transfer -- Digital Art

**Contact: Customer Service                      Direct: (316) 945.7052    Direct Fax: (316) 945.8076**  
**Email Address: art@ps-printsources.com                      Email Art File Size: Up to 5 Megabytes**

### **Windows – OS**

**Corel Draw** – Versions 3 through 12  
**Gerber Omega (Graphix Advantage)** – Version 1.56  
**Adobe Illustrator** – up to Version CS  
**QuarkXpress** – Version 6  
**Adobe Acrobat** – Version 4  
**Photo Shop** – Version CS  
**In Design** – Version CS  
**MacroMedia Freehand MX**

### **Macintosh – OS X**

**Adobe Illustrator** – up to Version CS  
**Adobe Photoshop** – up to Version CS  
**Adobe Pagemaker** – up to Version 7  
**QuarkXpress** – Version 6.5  
**Adobe Acrobat** – Version 6  
**In Design** - Version CS  
**MacroMedia Freehand MX**

**Font Information-** Convert Text to Paths (or curves). Text that becomes an object can no longer be edited as text. If this is not possible then send all Screen and Printer Fonts used in the files. Macintosh files can be sent in their native format (OS X or OS 9.2). Fonts must be embedded or sent with files to install on our equipment.

**Colors-** When assigning colors to art and text use PMS spot colors. If you are using one of the standard ink colors please assign a PMS spot color and it will be changed to a standard color specified on your purchase order.

**Accepted File Storage-** Mac or PC formatted 3.5" diskettes  
Mac or PC formatted Zip disk  
Mac or PC formatted CD ROM

**All media must be accompanied with the following visual proof-**

- a.) A composite proof and color separation instruction on multiple colored jobs or a black and white hard copy on single color jobs is acceptable.
- b.) A file names and formats of the file.

**Output Screen Angles for Separations-**

- a.) Film positives right reading emulsion up (line screen determined with artwork)
- b.) Screen angles color separations  
Cyan - 7.5 degrees / Magenta 37.5 degrees / Yellow 82.5 degrees  
Black - 67.5 degrees

Compliance to the recommended instructions above does not guarantee that the media or electronic transfer will output production capable art. Art files that are not provided as compliant to our software versions will be charged a min fee of \$35.00 for converting files via outsource providers. If your digital art files require text copy updating, you will be charged at a \$45.00 per hour rate. Please provide change instructions and a contact person for composite art proof approval. Customer service will contact you if the digital file format or requested art change/s are subject to service charges. Design services are available at \$80.00 per hour and/or quoted based on scope of the design project.

**IT SHOULD BE NOTED THAT JPEGs, TIFs, AND BIT MAPS ARE NOT ACCEPTABLE ART, AS THEY WILL REQUIRE ADDITIONAL ART TIME TO CONVERT, UNLESS JOB IS TO BE PRODUCED AS FOUR COLOR PROCESS.**
